# Season's Greetings from H-D Electric Cooperative

**Matt Hotzler**  
Manager

“The holidays.” There’s a lot to like about this time of year. The thought of the holiday season brings a smile to my face and evokes a sense of comfort and nostalgia. Recalling family gatherings and traditions warms my heart and fills my senses.

It’s a time of reflection. I’m grateful for my own family as well as my co-op family. At H-D Electric, we’re driven by a sense of mission and purpose. Our team feels a strong connection to our community and our members because we live here too.

While many of our community-focused programs and activities such as toy and food drives ramp up this time of year, we have several programs and services in place to help our members year-round. I’d like to remind you about some of these offerings in hopes you’ll find them beneficial.

We hope you’ll take advantage of SmartHub – an app that empowers you to monitor, manage and pay your energy bill conveniently through your phone. Another service we offer is budget billing, which is intended to help budget your monthly energy costs. We look at past years’ bills to determine what amount is needed to pay monthly, this levels out the monthly bills throughout the year and “trues up” annually. We also offer energy programs to save money and energy such as supplemental heat meters, peak control of water heaters, in-floor shop heat and irrigation systems.

In addition to helping members save today, we’re focusing on the future. In our area, we’re seeing increased interest in renewable energy sources. Recent innovations and advances have led to increases in renewable energy. H-D Electric gets much of its energy from non-carbon sources. One great example is the power provided

by the WAPA dam system. We have a fixed WAPA allocation through East River Electric that today provides about 16 percent of our power. Since it is a fixed amount of power we receive the percentage decreases as we increase our energy sales. In recent years, Basin Electric, the power supplier for H-D Electric, has a diversified its winter portfolio of generation to include more renewables. Today, the winter peak capacity of generation includes over 30 percent of renewable energy sources (25 percent of their renewable capacity is from wind). Add that to the nearly 16 percent of H-D energy that comes from WAPA dams and you can see much of your energy is coming from renewable energy sources. But that’s not the end of the renewable story, as Basin Electric has committed to purchase the output from a 142 MW wind project to be completed in 2023, and 318 MW from four solar projects scheduled for completion in 2023 and 2024.

You may have noticed H-D Electric has an electric vehicle (EV) we purchased in 2020. We named it Joule after a unit of energy. We invested in an EV to promote a greater understanding of EVs and to have it available for you to see, feel and even drive. From a distribution planning perspective, we needed to learn their charging characteristics so we can plan for future charging loads. We also wanted to understand the range of the vehicle, the effect of temperature on batteries, charger types, time to charge and the availability of chargers out on the road. So, as the major car manufacturers continue their path toward increasing their electric options, we have real-world experience we can share with you.

One of the most important investments we make is in our local youth. H-D Electric has logged numerous volunteer hours supporting schools, youth clubs and programs. Along with these programs, H-D Electric along with Basin Electric awards more than \$2,000 in scholarships annually for local students. Each year, through our Youth Tour program, we send a high school junior or senior to Washington, D.C., for a

H-D ELECTRIC COOPERATIVE CONNECTIONS is published monthly by H-D Electric Cooperative, Inc., PO Box 1007, 18240 SD Hwy 15, Clear Lake, SD 57226-1007 for its members. Families subscribe to H-D Electric Cooperative Connections as part of their electric cooperative membership. H-D Electric Cooperative Connections' purpose is to provide reliable, helpful information to electric cooperative members on matters pertaining to rural electrification and better rural living. H-D Electric Cooperative is an equal opportunity provider and employer.

Subscription information: Electric cooperative members devote 50 cents from their monthly electric payments for a subscription. Nonmember subscriptions are available for \$12 annually. Periodicals Postage Paid at Clear Lake, S.D., and at additional mailing offices.

POSTMASTER: Send address changes to: H-D Electric Cooperative Connections, PO Box 1007, Clear Lake, SD 57226-1007; telephone (605) 874-2171; toll-free 1-800-358-7233; fax (605) 874-8173; e-mail info@h-delectric.coop  
Design assistance by SDREA.

**Season's Greetings, Continued**

week-long immersion to experience democracy in action.

In 2021, we had a very busy, productive year and we sold a lot of energy. With the great energy sales being above budget and H-D being below budget in expenses, the board of directors has decided to give back some of the margins earned before year's end with an energy credit on your Dec. 1 electric bill. A total of \$250,000 will be divided and credited based on the electric bills from January to October 2021. While the final numbers are still being worked out, at the time of writing this article, we anticipate the credit will be between \$20 to \$25 per \$1,000 spent from January to October. This most likely won't pay your entire December bill but every bit helps this time of year and this is a way we can show another example of the advantages of being a member-owner of the H-D Electric Cooperative.

At the heart of all of these programs is you – the members we proudly serve. Looking back, I'm grateful for so many wonderful community partners and for the positive impact we can continue to make.

This holiday season, I wish you and your loved ones peace, joy and prosperity. Speaking on behalf of our team at H-D Electric Cooperative, I know the future will be bright, because of you.

**Merry Christmas and Happy New Year!**

Thank you for all your business in 2021!

Our office will be closed Friday, Dec. 24, 2021, and Friday, Dec. 31, 2021.

Everyone at H-D Electric Cooperative wishes you a very Merry Christmas and Happy New Year's!

# Ready your home for a winter break during the holidays

If you're planning to be out of town for an extended period of time during the holidays, take heed of the following recommendations to save some energy and keep your home safe while you're away.

- Set your home's thermostat to 50 degrees. This temperature is a happy midpoint that avoids wasting energy to warm an empty house while still preventing damage to your pipes and plants. If sub-20-degree days are forecast during the time you are away, drip faucets.
- Turn off your electric water heater at the breaker or set it to the lowest temperature possible.
- To avoid a potential fire hazard, unplug the washer and dryer before you leave your home. Disconnect the hoses leading to the washer to prevent them from freezing.
- Unplug all of your small appliances. You'll reduce the risk of a house fire and save a bit on your electric bill.
- Don't broadcast your travel plans on social media. Instead, share photos from your trip after you return.
- If you set a timer for your outdoor or indoor lights, make sure to switch up the times over the days you'll be gone so it's not obvious to any onlookers that the house is empty when lights go on at 6 p.m. every day like clockwork. If possible, stagger several timers that control different lights to approximate the natural movement of someone through a house.
- Close blinds and curtains. Don't advertise your belongings to any would-be house burglars.
- Be strategic about putting out post-holiday recycling and trash. If there are a lot of boxes from new gadgets or other expensive electronics, wait until you get back to put them out so they're not sitting outside in full view for days. Or have a trusted neighbor set them by the curb on the appropriate day.
- Place a hold on all mail and newspaper deliveries, and ask a neighbor or a friend to pick up any packages from your porch.

## DID YOU KNOW?

On Christmas Eve 1923, President Calvin Coolidge began the country's celebration of Christmas by lighting the first National Christmas Tree decorated with electric lights.

### Don't cut down trees by power lines

#### Milo Thompson

Milo reminds electric cooperative members that cutting down trees located near power lines can be hazardous. Milo is the child of Kurt and Rebecca Thompson of Hayti. They are members of H-D Electric.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

# HOLIDAY DESSERTS

## CRANBERRY CAKE

Ingredients:  
 3 Tbsp. butter  
 1 cup sugar  
 1 egg  
 2 cups flour  
 1 cup milk  
 3 tsp. baking powder  
 1/4 tsp. salt  
 2-3 cups raw cranberries

### Butter Sauce

1/2 cup butter  
 1/2 cup evaporated milk or cream  
 1 Tbsp. flour  
 1 tsp. vanilla

### METHOD

Grease and flour a bundt pan or 9 x 13 inch pan. Cream butter, sugar and egg. Beat in flour, milk, baking powder and salt. Fold in cranberries. Spread batter in pan. Bake at 350 degrees about 45 minutes. Bundt pan may need one hour. Serve with butter sauce. For butter sauce, mix flour and sugar. Place all ingredients except vanilla in saucepan. Heat, beating well over high heat until hot and bubbly. Add vanilla. Serve warm over cranberry cake.

Mary Jessen, Holabird

## BAKED RICE PUDDING

Ingredients:  
 2 cups milk  
 1 cup water  
 1/4 cup sugar  
 3 tbsps. rice  
 1 tbsps. butter  
 1/4 cup raisins  
 Pinch of salt

### Topping

Sugar  
 Cinnamon  
 Milk

### METHOD

In a 2-qt. baking dish, add milk, water, sugar and rice. Stir together. Add a pinch of salt and raisins. Bake at 350 degrees for one hour. Take out of oven and add butter. Let sit while you eat main meal. Dish up in bowls, sprinkle with sugar, cinnamon and add milk.

Deanna Dean, Artesian

## FANCY CHRISTMAS CAKES

Ingredients:

### Cakes

1 pkg. (2-layer size) white cake mix  
 1 tbsps. McCormick® Red Food Color  
 1 tsp. McCormick® All Natural Pure Vanilla Extract  
 1 tbsps. McCormick® Green Food Color  
 1 pkg. (16 oz.) chocolate candy coating, such as CANDIQUIK®

### Buttercream

1/2 cup (1 stick) butter, softened  
 1 tsp. McCormick® All Natural Pure Vanilla Extract  
 1 pkg. (16 oz.) confectioners' sugar, sifted  
 2 tbsps. milk  
 Pinch of salt

### METHOD

Preheat oven and prepare batter as directed. Divide batter evenly into 2 bowls (about 1-1/2 cups of batter each). Stir red food color and vanilla into first bowl. Stir green color into second bowl. Pour red and green batter into greased 13 x 9-inch baking pans. Gently tap on counter to remove any air bubbles. (If you do not have 2 13 x 9-inch pans, bake one color cake first, then reuse the pan to bake the second.) Bake 6 minutes. Remove pans from oven and tap on counter to remove any air bubbles. Return pans to oven and bake 6-9 minutes longer. Cool in pans 10 minutes. Invert cakes onto wire rack. Cool completely. Refrigerate cakes until ready to assemble. For buttercream, beat butter in large bowl with electric mixer until light and fluffy, about 3 minutes. Add vanilla and mix. Gradually beat in confectioners' sugar on low speed, scraping sides and bottom of bowl after each addition. Add milk and salt; beat on medium-high until light and fluffy, at least 3 minutes. If frosting is too thick, beat in additional milk.

[www.mccormick.com](http://www.mccormick.com)

Please send your favorite soup recipes to your local electric cooperative (address found on Page 3). Each recipe printed will be entered into a drawing for a prize in December 2021. All entries must include your name, mailing address, phone number and cooperative name.

## Dear Pat and Brad: Our energy bills seem higher than they should be, but I'm not sure where to start looking around my home for opportunities to save energy. Do you have any suggestions? – Les

**Pat Keegan**  
Collaborative  
Efficiency

**Brad Thiessen**  
Collaborative  
Efficiency

Dear Les: That's a great question. There are many products and services that claim to provide maximum energy efficiency, so it can be challenging to know where to start. Fortunately, our monthly bills can help identify areas for the most energy savings.

For the vast majority of homes, the months that require the most energy use are in the winter and summer when temperatures are most extreme. Just total up your average energy use for the months when you use the most energy, then subtract the average amount you use during "shoulder months," when you're barely using your heating or cooling system, typically during fall and spring.

The most likely reason for the difference in energy use is heating and cooling your home. If someone says switching to a new heating or cooling system could save you 20 percent, they likely mean you can save 20 percent on heating or cooling costs, which are a portion of your overall energy costs.

Every home is different. For example, there's a small percentage of homes that include uncommon energy uses like a well pump, swimming pool or a home business that requires more energy than heating or cooling. But typically, heating and cooling your home are by far the largest energy uses.

Sealing air leaks is often the least expensive energy-saving measure that delivers the most bang for your buck. The second most cost-effective way to cut heating and cooling costs depends on your situation.

If you have an older propane or oil furnace, replacing it with an energy efficient heat pump might be your best investment. If you already have a relatively efficient furnace or

air conditioning unit, insulating your attic could be the next most cost-effective measure, followed by insulating exterior walls or the crawl space or basement.

Replacing windows is a high-priority project for many homeowners, and new windows can certainly add value to your home. However, this can be a costly project, making it difficult to justify solely based on potential energy savings. If your windows are old and leaky, it could be worth the investment. Do your research upfront so you fully understand the costs of the project.

After you've found ways to reduce your heating and cooling costs, where else should you look for energy savings? Your next largest energy use is likely water heating. A few low-cost measures like repairing leaky faucets and insulating the first 6 to 10 feet of hot water line could deliver significant savings. Installing energy efficient showerheads can save water and reduce energy use. Check out Consumer Reports for reliable comparisons and reviews of energy efficient showerheads.

If your water heater is more than 10 years old, it's likely time to consider how and when to replace it. You can purchase a traditional water heater that uses the same fuel you're using now. But there are several other options, including heat pump water heaters, tankless water heaters and even solar water heaters. Be sure to do some research before your water heater breaks so you know about your options.

Appliances and lighting account for a smaller portion of your overall household energy use. As you replace older appliances and lighting, look for options that include the ENERGY STAR® sticker. You should also review energy use information found on the EnergyGuide label.

We hope this information will help you start to identify areas to save energy at home. Consider enlisting the help of an energy auditor who can provide an overall assessment of your home's efficiency.

Ben Hanten, left, has expanded his craft brew business in Yankton and reports record sales. *Photos provided by Ben Hanten.*

# BEN'S BREWING CO.

## Ben Hanten transforms Yankton's Freeman Building into a taproom and event venue

**Billy Gibson**

[billy.gibson@sdrea.coop](mailto:billy.gibson@sdrea.coop)

Visitors to Ben's Brew Station in Yankton will find a number of mixed metaphors to stir the imagination.

There's the artwork hanging from the ceiling that depicts intriguing representations of various types of air craft, like a bi-plane made out of carpenter levels and a Spruce Goose replica with metal roller skate wheels for landing gear. The eclectic set of suspended sculptures represent the Freeman Company, an aerospace manufacturing business that once occupied the spacious building located on Walnut Street.

The name itself refers to the fact that the entertainment venue is situated a block away from an old railroad depot and there's a rail spur that enters the 28,500-sq. ft. building, which was used to convey products to the rail line for delivery to customers all across the country.

There's also a vintage vibe with a line of 1950s style pinball machines along one wall and pub games like darts, corn hole and bocce ball.

Finally, there's the names of the brews themselves, sure to pique a patron's

curiosity – descriptive designations such as Raspberry Porter, Bishop Marty, Walshtown Irish Red, Oktoberfest, West Side Live, Pineapple Heat, Strawberry Rhubarb, Slic and many more.

After 16 years owning and operating Ben's Brewing Company, Ben Hanten expanded his business by opening The Brew Station last summer. He acquired the building with the vision of creating a fun and energetic environment to serve custom brews while offering live music, games and menu options provided by local food trucks. Frequent vendors during weekends and special events include Grind N' Griddle, Broken Trellis, Up in Smoke and Windy City Bites. Popular entertainers such as Adam Moe and Shawn Coles have taken The Brew Station stage.

Customers come for the fun and fellowship but also for the craft beer and to see what new blends happen to be on tap. In October, for instance, a brew called Madcat Pumpkinslapper was on the menu through a collaborative effort with Jefferson Beer Supply and Madcat Pumpkin Patch. The blend included real pumpkin and gourds, and a number of spices like cinnamon, nutmeg, cloves and ginger.

Crafting new flavors never gets old

### THE BIG FOUR BREWS

Here are the top sellers at Ben's Brewing Company:

**West Side Park IPA** – The company's flagship product blends Dakota Challenger, Amarillo and Citra hops for a full juicy flavor with hints of orange, mango and grapefruit.

**Kenny Pepper Cream Ale** – the heat is on with this ale that's sure to warm the palate with roasted jalapenos and a hint of malt.

**Kelly's Cove Golden Ale** – a refreshing, easy-drinking ale with a light, delicate hop profile featuring Citra and Azacca and a smooth, clean finish.

**Burleigh** – a brown ale with a touch of roast, nuts and chocolate.

for Hanten. He enjoys visiting with customers, giving tours of the brewery and sharing stories of the building's history and colorful namesake, Edgar Freeman.

"He was quite a character," Hanten said. "We've learned a lot about him and many of the employees who worked at The Freeman Company have added a lot of extra details, too. We started the bar 16 years ago, and it's fun to see it blossom into this," Hanten said.

Hanten reports that his brew revenue is up nearly 90 percent with plans to venture into the canning business in the coming year. He said customers can look for the Ben's Brewing Company label "anywhere you buy beer."

# CHRISTMAS AT THE CAPITOL

Each year, musicians and other entertainers from across the state perform for the tens of thousands of visitors who travel to Pierre to see the “Christmas at the Capitol” displays and decorations. *Photo by Billy Gibson*

## Christmas at the Capitol: Celebrating 40 years of yuletide splendor and dazzling displays

**Billy Gibson**

[billy.gibson@sdrea.coop](mailto:billy.gibson@sdrea.coop)

With all of its spectacular lights, familiar carols and colorful decorations, Christmas at the Capitol inspires thousands to become awash in the spirit of the season.

It’s an especially magical and meaningful event for Moriah Gross, founder and director of the Pierre Youth Orchestra. Over the past decade, Gross and her students have performed in the Capitol Rotunda and added to the yuletide ambiance that more than 20,000 visitors travel from far and near to experience.

Gross is one of many performers slated to appear in the Rotunda as Christmas at the Capitol takes place from Nov. 23 through Dec. 26. Visitors to this year’s celebration can expect to see brilliant hues of ruby, pink and pearl in recognition of the event’s 40th anniversary.

“Winter Wishes” is the theme for 2021 as nearly 100 decorated trees will line the halls and fill the

historic structure. Local businesses and government agencies, non-profit organizations and other community groups from across the state will once again put their decorating skills to the test and give the Capitol and its environs a South Dakota Christmas flair.

This year’s official lighting ceremony will take place on Tuesday, Nov. 23, at 7:30 p.m. The popular Pie Day is set for Saturday, Dec. 4, from 11 a.m. to 3 p.m., when complimentary slices of pie, cookies, coffee and ice cream will be offered along with live musical entertainment sure to spark the Christmas spirit.

Gross said she and her students look forward to the event each year, but one memory stands out for her among the rest. Two years ago, she accompanied a guest performer who sang the traditional carol Silent Night in the language of the Lakota Sioux.

“It was so spectacular and moving to be able to have that experience there inside the State Capitol and honoring the Lakota people and

culture, and also to have our students experience that as well,” said Gross, a member of Oahe Electric Cooperative outside of Pierre.

A native of Kansas and accomplished string instrumentalist, Gross relocated to Pierre 10 years ago and soon realized there was no educational string program for public school students. So, she started the Pierre Youth Orchestra, which has nearly 40 students who are set to perform at the Capitol on Sunday, Dec. 19, at 5 p.m.

**THIS YEAR’S OFFICIAL LIGHTING CEREMONY WILL TAKE PLACE TUESDAY, NOV. 23, AT 7:30 P.M. THE POPULAR PIE DAY IS SET FOR SATURDAY, DEC. 4, FROM 11 A.M. TO 3 P.M.**

Gross said while she calls the Capitol “one of my favorite places to perform,” the experience is also beneficial for her music students in many ways.

“It’s just the opportunity to play for

## DECKING THE CAPITOL HALLS

Nearly 100 trees are decorated by clubs, associations, non-profits and government agencies. *Photo by Travel South Dakota.*

an audience in this kind of setting. It's very intimate and not like playing on a stage in a large theater where the audience is sitting at a distance away from you," she said. "In the Rotunda, there are people all around, sometimes standing room only, and they're very close and intimate. It's an emotional time of year and you get to really connect with the audience. At the same time, they have to be disciplined and focused on what they're doing. It's a unique experience that a lot of students don't always get to have."

She said many students will return after they've graduated from the program and sit in on the performance and have their photos taken with the current crop of students at the Capitol.

Observing Christmas at the Capitol from behind the scenes, Gross noted the many individuals and volunteers who help make the event a success each year.

"I can't say enough about all the committees, greeters, volunteers, organizers and others around the

Approximate number  
of annual visitors

**20,000**

to the Christmas at  
the Capitol event.

community who make this possible for people coming in from all over the country and the world. You have the sights and sounds and scents of the pine trees, and it all adds up to a wonderful holiday experience," she said. "There are so many people who all work together to make this something special."

The annual holiday event started back in 1981 with a dozen decorated trees and has grown in popularity through the past 40 years. Visitors can look for some of the more popular recurring displays such as a set of hand-painted porcelain ornaments from the China Painters Organization and an old wooden nativity scene that the local Knights of Columbus group sets up on the second floor of the Capitol each year.

Those interested in serving as a volunteer for the event can contact [rick.augusztin@state.sd.us](mailto:rick.augusztin@state.sd.us).

The State Capitol grounds are also decorated to evoke the spirit of Christmas. *Photo by Travel South Dakota.*

## 2022 H-D Electric Director Election to be Held in March

H-D Electric director elections will be held at H-D Electric’s annual meeting on March 22, 2022. The annual meeting this year will be at Hamlin Education Center in Hayti, S.D.

Director nominations are by petition only. Petition forms are available at the H-D Electric office and must be signed by at least fifteen memberships, (individuals of joint memberships count as one membership). Petitions will be available after Jan. 6, 2022 and must be returned to the office by Feb. 25, 2022. However, because of publication deadlines, in order to have the candidate profile published in the March *Cooperative Connections* annual meeting report magazine, petitions should be submitted at or prior to Feb. 1, 2022.

**Mark Your Calendar  
The Date Has Been Set!**

**Tuesday  
March 22, 2022  
Hamlin Education Center, Hayti, S.D.**

### Three director districts for this year are the following.

- **District 1** including the following townships: Brandtford Township, Oxford Township and Opdahl Township, Hamlin County, S.D.; and Kampeska Township, Codington County, S.D.
- **District 2** including the following townships: Hayti Township, Florence Township and Castlewood Township, Hamlin County, S.D.
- **District 6** including the following townships: Lowe Township, Antelope Valley Township, Glenwood Township and Herrick Township, Deuel County, S.D.; Adams Township, Grant County, S.D.; and Mehurin Township, Lac Qui Parle County, Minn.

## H-D Electric Welcomes Joseph Jr.

H-D Electric would like to welcome Joseph Jordan Jr. to the line crew full time. Joseph is no stranger to H-D Electric. He started working for this electric cooperative part time in 2018 in the Building and Property Department. In the summers of 2019 and 2020, he helped the construction crew install underground, and in 2021, Joseph came on as a 1,000-hour lineman after graduating from the Line Power Construction and Maintenance program at Mitchell Technical College. Joseph is from Clear Lake, S.D., where he likes to hunt and fish when he’s not working. He says his special skill is working well with others.

## Energy Efficiency Tip of the Month

### Heading out of town for the holiday season?

Remember to unplug electronics that draw a phantom energy load. Some gadgets like TVs, phone chargers, gaming consoles and toothbrush chargers use energy when plugged into an outlet—even when they’re not in use.

# Power Partners

Farmers have enough to worry about without having to think about energy bills. That's why your local Touchstone Energy® Cooperative is your partner in power, walking alongside you, dedicated to helping your farm or ranch become more energy-efficient. Because the more energy efficient your operation is, the lower your energy bills are. When your energy bills are lower, it means more of your money stays where it belongs: in your pocket.

With that in mind, here are eight energy-saving tips you can use to make your operation more energy efficient.

## 1. Swap Your Bulbs

If you're still using incandescent or CFL bulbs, consider swapping them out for LEDs. These bulbs use considerably less energy and can last up to 50 times longer than traditional incandescent bulbs and eight to ten times longer than CFL bulbs. If you do continue to use incandescent bulbs, keep in mind that dirty bulbs and fixtures can reduce light levels, and things like moisture and dust can shorten the bulb life to less than its estimated "rated life."

## 2. Upgrade Ventilation

Whatever kind of livestock you run, quality ventilation is vital. Even in buildings without animals, such as your shop or storage buildings, replacing older

ventilation fans with high-efficiency options can reduce energy use. Whatever kind of livestock you run, replacing older ventilation fans with high-efficiency options can reduce energy use. Be sure to keep your fan blades clean from dust, feathers, hair and other things, which can reduce efficiency. You may also want to add Variable Frequency Drives to inverter-duty fans. This may not only increase efficiency, but also improve the motor life.

## 3. Insulate Buildings

Even the smallest cracks and holes in your buildings can waste energy, especially in the coldest and hottest months of the year. Adding extra insulation and updating your HVAC to more energy-efficient equipment can save you a lot in the long run. Even doing simple things like minimizing drafts by aligning doors and windows can help reduce your energy bill.

## 4. Manage Water

Keep your livestock hydrated with low-energy or energy-free waterers. These use less energy while keeping water fresh and preventing freezing. For irrigation, use low-pressure sprinkler nozzles. These reduce pumping demands without limiting water flow. That way your crops get the water they need at a lower cost and your pumps last longer.

## 5. Use Heat Reclaimer

Reduce energy waste with a heat reclaimer, particularly on dairies where milk collection and storage use a huge amount of energy. A dairy heat reclaimer allows you to capture waste heat from outdoor milk refrigeration units and uses it to heat water.

## 6 Use Creep Heat Pads

Heat lamps are highly inefficient when it comes to energy consumption. Creep heat pads are essentially blankets that will keep your swine or poultry warm while using much less energy.

## 7. Keep an Energy Log

Keeping an energy log is an easy and inexpensive method of tracking your energy use. It allows you to study and compare use and costs from month to month. Contact your local Touchstone Energy® Cooperative for any questions on your bill for future use.

## 8. Contact Your Co-op

Always remember that you can reach out to your local Touchstone Energy® Cooperative at any time with questions, concerns or comments. As a co-op member, you have the power of collaboration with a team of energy experts dedicated not only to providing you reliable power, but keeping your rates as low as possible.

## Revenue Refund

The H-D Electric Cooperative Board of Directors approved a one-time revenue refund of **\$250,000** to active member-owners who purchased electric power from the cooperative in 2021. H-D Electric has stronger than expected margins in 2021, and as a result, the cooperative is returning the margins back to member-owners. In May 2021, H-D Electric paid out a capital credit refund of **\$390,000**. When combined, the revenue refund and capital credit retirements add up to **\$640,000** being returned to H-D Electric members within this past year.

The individual credits are based on the electric service revenue by each member from January to October 2021. This credit will not come to you as a check but rather as a credit on your December Electric Bill. The credit is listed as a line item on your December bill statement for November usage.

In addition to the revenue refund, H-D Electric is pleased to announce to members that **no rate increase** is expected for 2022.

# SEARCHING FOR THE STARS

Badlands Observatory photographer Teresa Hofer captured this image of The Pleiades, also known as the Seven Sisters.

## Badlands Observatory welcomes stargazers, researchers and others interested in pursuing the field of astronomy

**Billy Gibson**

billy.gibson@sdrea.coop

For centuries, astronomers have sought to find a scientific explanation for the Star of Bethlehem, which is described in the Gospel of Matthew as the celestial sign that led the Magi into the presence of the Christ child.

Some have speculated that the object high in the night sky could have been a supernova, a comet or possibly a conjunction of the planets Jupiter and Venus.

Accomplished astronomer Ron Dyvig has views of his own. As a researcher who adheres to scientific methods, he's a bit hesitant to plow into topics where science and faith may collide.

But when pressed to offer an educated opinion on the Christmas Star, he replies, "There are several elements that make it challenging to address from a scientific standpoint and there are a

half-dozen theories beyond what's there in the Biblical accounts. But I think it could have been a nova or the planet Venus. Venus can be remarkably bright after sunset when it appears to descend in the west for several weeks. That may have been what the Magi saw and would be something they could follow. But a lot of people have strong religious beliefs about it, and if you believe it was a miracle, then science can't really explain it adequately."

Dyvig is founder of the Badlands Observatory, which he opened for his own private viewing and independent research in 2000. Two years ago, he began renovating the facility located in the small community of Quinn just north of I-90, with the goal of one day welcoming members of the public interested in astronomy.

While the renovation project is not fully complete and a grand opening is set for next spring, Badlands

Observatory is now welcoming visitors by reservation only.

"Since we got settled into this facility, there has just been so much public interest in it that we decided to go public. It's as simple as that," Dyvig said. "Right now we're taking it slow with small groups. During the winter months our activities will be curtailed a bit, then we'll expect a busy spring."

A native of Deadwood, the 79-year old Dyvig took a keen interest in astronomy at an early age when he was

Teresa Hofer and Ron Dyvig are long-time collaborators who have opened the Badlands Observatory to public access.

introduced to the discipline by his local Boy Scout troop leader. He created his first observatory as a youngster when he made a concrete pad and a cylinder to hold his telescope in place in the middle of a rancher's field. During his high school and college years, he spent late nights scanning the skies, marveling at the vastness of the universe and hoping to discover new heavenly bodies.

As a college student, Dyvig learned and taught the art of telescope-making and became president of the Black Hills Astronomical Society. He later designed and fabricated the optics for the Hidden Valley Observatory in Rapid City.

Dyvig spent time honing his craft as a research assistant at the University of Arizona where he worked under several mentors and utilized the advanced facilities at Kitt Peak National Observatory. He was chosen to help design and test image intensifier camera systems for Steward Observatory.

While through the decades he kept day jobs to support his avocation, his evenings were spent star gazing and pursuing new discoveries. His passion and dedication to astronomy paid off when he discovered - and aptly dubbed - Asteroid 26715 South Dakota just a year after opening the Badlands Observatory. It's just one of the 25

Photographer Bob Rossiter and Ron Dyvig are shown with the 26-inch Newtonian Reflector telescope at Badlands Observatory.

discoveries credited to Dyvig during the course of his astronomy work.

Building the observatory was no small task. First, he found and converted an old medical building in Quinn to house the facility. Then he personally designed and fabricated all of the optics, including grinding and polishing the mirror for the 26-inch f/4.8 Newtonian Reflector telescope. West River Electric

Cooperative worked with Dyvig and the town of Quinn to install hoods over surrounding street lights to reduce "light pollution" and enhance the ability to scan the night sky.

Dyvig describes himself as fortunate to find a partner in Teresa Hofer, a career accountant who shares his passion for all things celestial.

There's always something to be done

at the observatory, Hofer said. Ongoing duties include maintaining and upgrading the optical and drive systems, control systems for the telescope and dome, facility management, designing and implementing new educational programs for visitors, website updates and keeping up-to-date on developments in the field of astronomy.

"There's plenty to do, especially since we decided to make the facility public after we figured people might like to see what we do," she said. "We had to make sure everything was comfortable for the public and do a lot of renovating and painting and upgrading."

Hofer said she is starting to promote the observatory as a destination for astronomy enthusiasts who might be interested in touring the facility and peering through one of seven telescopes on the observation deck. Dyvig is in the process of also building a radio telescope to add to his collection.

Those interested in experiencing the Badlands Observatory can call 605-381-1521 to set up a viewing time or visit [www.badlandsobservatory.com](http://www.badlandsobservatory.com).

The Orion Nebula has long captured the imaginations of star watchers as it has been associated with the Greek myth of a huntsman placed among the stars by Zeus.

# BUILDING RURAL LEADERS

Minnesota Ag Rural Leadership Class IX members develop problem-solving skills during a “Building Strong Teams” session.

## Working today to develop tomorrow’s rural community leaders in South Dakota and Minnesota

**Billy Gibson**

[billy.gibson@sdrea.coop](mailto:billy.gibson@sdrea.coop)

Success in any endeavor calls for solid leadership. Don Norton of the South Dakota Agricultural and Rural Leadership Program (SDARL) is eager to build better leaders who envision a more prosperous future for individuals, families and businesses across the state.

Norton believes leadership skills don’t just materialize out of thin air. Those skills and abilities have to be taught. That’s the goal of SDARL, an 18-month program that takes participants through an intensive course of conferences, class time and state, national and international seminars all designed to prepare the students to return to their communities and make positive contributions.

“You don’t see SDARL graduates sitting on the sidelines,” Norton

said. “They’re stepping up to serve on commodity and corporate boards, in community organizations, in government and in their families, leading and taking action and inspiring others to do the same.”

SDARL Class VII graduate Mike Traxinger of Claremont is doing anything but sitting on the sidelines. Traxinger is a fifth-generation farmer and rancher who also serves as general counsel and director of governmental affairs for Agtegra Cooperative. He recently joined the board of directors at Northern Electric Cooperative based in Bath, is past president of the American Agricultural Law Association, co-chair of the Agricultural Law Committee of the State Bar of South Dakota and a member of the South Dakota Farm Bureau, Farmers Union and South Dakota Simmental Association.

“The SDARL program really helped hone my leadership skills and gave me more insight into ways that I could make a difference that I hadn’t thought of before,” said Traxinger, who also serves as president of the South Dakota Association of Cooperatives. “Leadership is vital to the continued success of rural America, farming and ranching operations, and our communities. And programs like SDARL are very effective in developing strong leaders who have a passion for service and a heart for helping others succeed in a way that’s beneficial for everyone.”

The SDARL Foundation was created in 1998 under the first Executive Director Dr. Dan Gee, who stepped into the role after retiring from the Animal Science Department at South Dakota State University. The first class started in 2000 with participants representing a range of backgrounds including ranching, farming, banking, media, government and private business.

Dr. Gee was the leader of SDARL

Leadership students take a field tour of a logging operation in northern Minnesota.

in 2008 when Olga Brouwer went through the curriculum. Brouwer was so impressed with Dr. Gee and the program that she later went on to become leader of the Minnesota Agriculture Rural Leadership (MARL) and has held that position for the past 10 years. She points out that both the MARL and SDARL programs were formed on the same day 21 years ago and have graduated a combined 600 students during that time.

“I learned so much from Dr. Gee,” said Brouwer, who once operated a dairy farm in Elkton. “He was super-educational and also provided a lot of insight into the political process, how to reach out. If you go and talk to legislators and staffers you find out there are reasons why things might not be working out so well. But in order to change things, you have to be at the table and be active, especially for cooperatives.”

While both programs have similar structures and operate in similar fashion, Brouwer said MARL is affiliated with the University of Minnesota Extension and places a bit more stress on the academic side in the learning material.

Kylie and Jake Rieke are both graduates of the MARL program and leaders in their community. Along with raising corn and bean crops, Jake is chairman and a founding organizer of the R-S Fiber Cooperative while Kylie serves on the board of Renville-Sibley Cooperative Power Association based in Danube, Minn.

Jake participated in MARL from 2018 to 2020 and was impressed with what he gained from the program. His group traveled to Cambodia and Taiwan to examine their agricultural practices.

“It was a great experience. For us, it blew open an entire network of connected individuals to draw off their expertise and bounce ideas off of,” he said. “Everybody in the group brings a unique background in different fields, so there are people you can call to ask questions or answer questions someone may have for you. It gives you a fast lane for networking and for getting your projects moving to accomplish whatever goals you have in front of you.”

Neither SDARL nor MARL receive direct funds from state or federal governments to support their programming. Participants pay

a percentage of the cost of going through the program but most funding comes from individuals, businesses and partnering organizations whose goal is to improve and develop rural communities.

One of those organizations standing in full support of both programs and the concept of rural leadership development is East River Electric Power Cooperative, which provides transmission, substation and distribution services for electric cooperatives in both states.

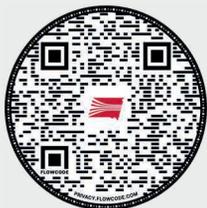

Those interested in investing in rural leadership through these programs can visit [www.sdagleadership.com](http://www.sdagleadership.com) and [www.marlprogram.org](http://www.marlprogram.org).

**Christmas Day  
December 25, 2021**

To have your event listed on this page, send complete information, including date, event, place and contact to your local electric cooperative. Include your name, address and daytime telephone number. Information must be submitted at least eight weeks prior to your event. Please call ahead to confirm date, time and location of event.
